

May 30th, 2019 | MCCCUC Renovation and Construction Update

As far as we can tell, the rain hasn't managed to slow our construction crew down at all! Beyond the ongoing work in the back office space, there are now significant changes happening on the outside of the branch. The crew has begun to repave the Fredericks Drive approach and has done extensive work on the back lot that will eventually become part of the building. In addition, the NAPA building demolition was completed late last week and the process of creating an even base for the site of our future North Building has begun!
